EXPERIENCE

- April 2025 – November 2025 **Software Developer**, Knowledge Plus IT Pty Ltd
- Maintained and enhanced systems used for Vergola, ensuring stability and efficiency.
 - Developed and implemented new features to improve user experience and usability.
 - Worked with HTML, JavaScript, PHP, and MySQL for both front-end and back-end development.
 - Established and managed a CI/CD pipeline using GitHub and a self-hosted GitHub runner, streamlining deployment and improving workflow reliability.
 - Contributed to system improvements by troubleshooting issues, optimizing performance, and ensuring smooth operations.
 - Developed and maintained both frontend and backend components, delivering a unified and efficient architecture.
- November 2024 – April 2025 **Junior Full Stack Developer**, Azakar Jewelry
- Engineered a high-performance, scalable e-commerce platform, enhancing Azakar Jewelry's online presence.
 - Developed a Next.js frontend with a PHP-based REST API backend, ensuring seamless and efficient functionality.
 - Integrated Xendit API for secure and smooth online transactions, improving checkout efficiency.
 - Designed interactive wireframes in Figma, reducing development iterations by 30% and accelerating decision-making.
 - Optimized website performance, reducing load times and enhancing user experience.
 - Managed both frontend and backend development, ensuring a smooth and cohesive full-stack architecture.
- May 2024 – October 2024 **Building Permit Fees Assessment**, Local Government Unit (LGU)
- Led end-to-end development of a custom web application to automate building permit fee assessments, reducing manual workload by 40% and improving data accuracy by 25%.
 - Enhanced operational efficiency by creating a responsive, user-friendly interface with Laravel, HTML, CSS, JavaScript, and MySQL, leading to a 30% increase in satisfaction among users.
 - Streamlined the approval process by designing wireframes in Figma, reducing development iterations by 20% and enabling faster decision-

making within the LGU.

- Managed full-stack development and integration of the application across multiple departments, making processing time significantly and improving data consistency.

Feb 2024 - May 2024

IT Support Internship, Umonics Method

- Delivered high-quality IT support services by efficiently resolving technical issues within tight deadlines, improving response times.
- Developed and managed WordPress pages, ensuring seamless content uploads and updates for educational materials, contributing to an enhanced user experience.
- Collaborated with the content and design teams to ensure seamless content uploads and website updates, aligning with branding and user experience goals.
